Electric Vehicle FOR A NEW CITY EXPERIENCE

Paolo Pipponzi Product Designer & Founder
Why Linky: Last mile mobility solutions lack true portability

- **Foldable Bikes**: Heavy and not compact
- **Monopattini**: Heavy and not compact
- **Electric Longboard**: Bulky
- **Rocket Skates**: Difficult to use
- **Electric Mini Skate**: Difficult to use
- **Hoverboard**: Easily catch fire

$33$ billions within $2026$
EVS and Vehicles for Personal Mobility
CAGR $17.26%$
Growth in the next $4$ years
IDTechEx analysis
The only electric vehicle that can fit in a bag

Industrial patent for the folding system.

Ultra portable Ultra light.

Several backpacks designed ad hoc.

Different styles and colours.
Portable
Stylish
Fun

Range: 11 miles
Speed: 18 mph
Weight: 5.2 Kg
Charging: 45 minutes

Features:
- USB charging port
- Riding modes selection
- Air Transport safe
- Water resistant IP65
- Front LED light
- Regenerative breaking

700 pcs sold and delivered – ecommerce & distributors.

Design ID protection of the style registered in USA and EU

Proprietary firmware and APP with Bluetooth LTE technology and on the air updates (OTA)
"Linky has definitely become my go-to electric longboard. It’s just so convenient that I have almost stopped using my other three electric skateboards completely. My electric scooter and three electric bicycles have also been getting neglected because now I usually hop on the Linky for the majority of my errands around town."

Micah Toll – Influencer journalist magazine Electrek

"The board worked perfectly even under the rain of Tokyo, thanks to its weather-proof design. I could experience the city like never before and reach areas I have never been."

@erathic - Customer & Instagrammer

"The DUCATI of the eboard!"
